contact Sen. Kyrsten Sinema and urge  
her to help do away with the filibuster (it  
might prevent Democrats from making  
our country a one-party place). It's only as  
I read the small print at the bottom of the  
postcard I see this is something from the  
Democrats.

As a Republican, I advise those who  
receive this postcard to realize it comes  
from the Democratic party, and it wants  
Republicans to have no effective participa-  
tion in future federal elections. If you are  
Republican, use the phone number given  
on that postcard to ask Sinema to hold  
firm - against H.R.1/s.1.

**Family history**

The two thought-provoking articles  
about immigration in Sunday's paper  
made me think of my own family's history.

My paternal grandfather emigrated  
from Russia when he was 12, along with  
his 14-year-old brother. His parents could  
only afford two passages. The two boys  
were turned back because the person meet-  
ing them at Ellis Island didn't find them.  
It took two years for the family to save  
enough money to send them again. No one  
damned his family for sending UAM's to  
seek a better life in America. Papa Sol told  
the story in a very matter-of-fact way.

In contrast to the demonization of the  
children crossing the southern border  
today, my grandfather's entry is now me-  
morialized and honored with his name  
enshrined at the National Museum of  
Immigration on Ellis Island.
